

International Senior Expert in Energy Efficiency

Job Summary:

As an International Senior Expert in Energy Efficiency, you would have to work on various energy efficiency projects and ensure their overall management.

Supervisor: Director of Operations

Specific Functions:

1. Overall Project Management

- Overall contract and schedule management.
- Preparation of detailed budgets and work plan, discussion and agreement on project needs for human and material resources with the Director of Operations.
- Responsible for task allocation, time schedules and contractual arrangements to coordinate project resources (internal and subcontractors).
- Responsible for maintaining the deliverables schedule pursuant to the contract.
- Maintain regular contact with clients to ensure that the work complies with the spirit and terms of the contract along with expectations.
- Supervision of junior resources.
- Quality control of deliverables.

2. Technical Tasks

The technical work would include, among others, the following topics:

- Energy auditing in commercial and institutional buildings as well as in industrial facilities.
- Technical assistance in energy efficiency and renewable energy projects.
- Studies in energy efficiency focusing on specific technologies or regions.
- Development of energy efficiency policies.
- Design of financing mechanisms for energy efficiency projects.
- Energy efficiency and demand-side management (DSM) program design, implementation and evaluation.
- Preparation of project idea notes (PINs) and project design documents (PDDs) for carbon emission reduction projects.

Background and Qualifications:

- Bachelor of engineering, science, economics, finance or any other relevant major degree.
- Master's degree in a related field would be an asset.
- Bilingual (English and Spanish), French would be an asset.
- A minimum of 10 years' experience in energy efficiency is required.
- A minimum of 3 years' experience in project management is required.
- International experience is required.
